## Goal

As a UX/UI designer and technology lover, I'm always up-to-date with the latest technologies and innovative solutions, with a particular interest in the IoT, automation world and solutions aimed at making daily life easier. This passion drives me to consistently integrate technological innovation and design principles into every project I work on.

The continuous pursuit of delivering high-level solutions motivates me to take on challenges that frequently require the development of new skills.

Always involved in user flow, information architecture, I believe that a good design needs to be not only beautiful, but functional, so that it effectively solves the user's problem. Then delivering through navigable prototypes, the result of multidisciplinary studies, creating interfaces that bring value to society and businesses.

## Academic Education

Instituto Europeo Di Design  
Graphic and Digital Design  
**2016 → 2018**

| CSS3                | ●●● | Advanced     |
| Fusion 360          | ●●○ | Intermediary |
| Figma               | ●●● | Advanced     |

## Professional Experiences

Atech - Embraer Group  
UX/UI Designer  
**July 2021 → At the moment**

- Responsible for building and maintaining the Style Guide for an air management platform for eVTOLs (vertical take-off and landing electric aircraft) based on the studies carried out by the team.
- Mentor of agile prototyping solutions and best practices.
- I conducted interviews and usability tests with flight controllers at flight control centers all over Brazil. Subsequently, I prototyped a new interface adhering to IHM international standards and ensuring color accessibility.

Atech - Embraer Group  
Junior UX/UI Designer  
**January 2019 → June 2021**

- Visual improvements of operating systems for air traffic management.
- Responsible for creating the visual identity of the Atech Design Team and team support materials.
- Solutions for complex weather systems in air traffic.
- Requirements analysis and development of practical and intuitive solutions.
- Low and high fidelity prototyping.

Atech - Grupo Embraer  
Intern UX/UI Designer  
**April 2018 → December 2018**

- Development of E-learning for training fighter aircraft pilots.
- Iconography.
- 3D modeling and ideation of objects in augmented reality.

Enterplay  
Junior Front End Programmer  
**April 2017 → April 2018**

- Development of new screens and functionalities for the company's On Demand service.
- Development of email marketing.
- Languages used: Javascript, HTML5, CSS3, jQuery.

Enterplay  
Intern Programmer  
**May 2014 → January 2017**

- Maintenance and implementation of the on-demand digital content platform (Movies, series and TV).
- Languages used: Javascript, HTML5, CSS3, jQuery, .NET, SQL.
- Front-end and Back-end programmer.

Unear  
Intern Programmer  
**April 2013 → April 2014**

- Maintenance and implementation of the customer communication system, which operates in all contact channels, such as email, SMS, internet, ATM, Call Center, among others.
- Languages used: JavaScript, HTML5, CSS3, jQuery, C#, SQL.
- Assistance in the transition of the Windows Forms product to HTML5.
- Assistance in the tool's interface.
